Task-4

The screenshot shows the GitHub web interface for the repository 'CPSY-300_Project01' under the user 'RiteshPatel17'. The page is titled 'Actions secrets and variables' and is part of the 'Settings' section. A notification at the top states 'Repository secret added.' The left sidebar shows 'Security' with 'Secrets and variables' expanded, and 'Actions' selected. The main content area explains that secrets are encrypted and used for sensitive data, while variables are plain text and used for non-sensitive data. Below this, there are tabs for 'Secrets' and 'Variables'. The 'Secrets' tab is active, showing a table of repository secrets. The table has columns for 'Name' and 'Last updated'. Two secrets are listed: 'DOCKER_PASSWORD' and 'DOCKER_USERNAME', both updated 'now'. A 'New repository secret' button is in the top right of the secrets section. The footer of the page shows the GitHub logo, copyright notice '© 2026 GitHub, Inc.', and links for Terms, Privacy, Security, Status, Community, Docs, Contact, Manage cookies, and Do not share my personal information. The Windows taskbar at the bottom shows the time as 7:41 PM on 2026-06-13.

Repository secret added.

Actions secrets and variables

Secrets and variables allow you to manage reusable configuration data. Secrets are **encrypted** and are used for sensitive data. [Learn more about encrypted secrets](#). Variables are shown as plain text and are used for **non-sensitive** data. [Learn more about variables](#).

Anyone with collaborator access to this repository can use these secrets and variables for actions. They are not passed to workflows that are triggered by a pull request from a fork.

SC6: Github repository secrets for CI/CD pipeline.

The screenshot displays the GitHub Actions interface for a workflow named "task-4 - simplified CI/CD pipeline #3". The workflow is triggered by a push event. The status is "Success" with a total duration of 53s. The workflow file is named "deploy.yml" and is located in the "on: push" event. The workflow consists of a single job named "build-and-test" which has a duration of 50s. The job is shown as successful with a green checkmark. The "Annotations" section shows a warning about deprecated Node.js 20 actions, suggesting the use of Node.js 24 instead. The warning text is: "Node.js 20 actions are deprecated. The following actions are running on Node.js 20 and may not work as expected: actions/checkout@v3, actions/setup-python@v4. Actions will be forced to run with Node.js 24 by default starting June 15th, 2026. Node.js 20 will be removed from the runner on September 15th, 2026. Please check if updated versions of these actions are available that support Node.js 24. To opt into Node.js 24 now, set the FORCE_JAVASCRIPT_ACTIONS_TO_NODE24=true environment variable on the runner or in your workflow file. Once Node.js 24 becomes the default, you can temporarily opt out by setting ACTIONS_ALLOW_USE_UNSECURE_NODE_VERSION=true. For more information see: https://github.blog/changelog/2025-09-15-deprecation-of-node-20-on-github-actions-runners/ Show less". The interface also includes a sidebar with links to "Summary", "All jobs", "Run details", "Usage", and "Workflow file". The top navigation bar shows the repository name "RiteshPatel17/CPSY-300_Project01" and the workflow name "task-4 - simplified CI/CD pipeline #3". The bottom status bar shows the system time as 8:26 PM on 2026-06-11.
